

Zaragoza (Spain), September 11<sup>th</sup> 2023

Dear IBERNAM-CMC2 Community,

We are pleased to announce the upcoming celebration of the 11<sup>th</sup> Franco-Spanish Workshop IBERNAM-CMC2 to be held in **Zaragoza** on **November 9-10<sup>th</sup> 2023** .

Since 2002, we hold a joint Workshop between IBERNAM and CMC2 (the French thematic network on sensors and microsystems) where we have the opportunity to meet with our colleagues and informally discuss results, collaboration opportunities and future joint actions.

The "**Leivmotiv**" of this 11<sup>th</sup> Edition is the **Sustainable Development Goals (SDGs) of the United Nations**. As this aspiration is in line with Horizon Europe, we encourage you all to **detail the contribution of your idea to the SDGs** in your abstract for the organization of our scientific program.

The Workshop is organized as a collection of **invited talks** (4) and **oral communications** (18), and a **poster session**, giving the opportunity to all attendees not to miss anything. Finally, the Workshop also features a social program, offering a unique framework for the exchange of ideas and the establishment of new collaborations.

We will soon share by e-mail more details about the scientific agenda, registration process, accommodations, as well as the social program.

Sincerely,

The organizing committee
